## LIGHTEN UP

Few things shout 'luxury' like a crystal chandelier, a lighting choice as stylish today as it has always been. There is something about a beautiful light fitting which changes the whole feel of a room. Unafraid to tamper with tradition, the Munich-based design duo behind Windfall has taken the concept of the classic chandelier and made it not only truly contemporary, but also completely show

stopping. Roel Haagmans from the Netherlands and German Clarissa Dorn are both classically trained in lighting design and are breaking new ground in the world of chandeliers. Their newly opened Munich showroom is the perfect place to go and check out their creations; from twists on the traditional to the utterly modern, their designs will take your breath away. We want one in every room. *HL*
